

AUDIO ANALOGUE

ARMONIA powered by 

VIVACE DAC / Preamplifier

 is synonymous of no compromise sonic performance, listening pleasure first of all, a signature more than a brand, a sign of recognition that immediately brings to mind emotions perceived through music and all its nuances. The technology  has developed to realize its products, has now been applied to the AUDIO ANALOGUE ARMONIA line products through the use of selected components and wiring obtaining performance of absolute reference for the category of these products and also far beyond.

The new ARMONIA line includes the well-known CRESCENDO Integrated Amplifier, CRESCENDO CD Player and FORTISSIMO Integrated Amplifier which in addition to being further improved with  technology, they have a new look more elegant and refined.

In addition to these products, are available today two new interesting models which are the FORTISSIMO CD Player/DAC and the VIVACE DAC/Preamplifier. ARMONIA powered by : feel the emotion, listen to the difference.

The **VIVACE DAC/Preamplifier** is a high performance DA converter that combines the highest digital audio technologies with an innovative zero feedback analog output stage. It is also provided with a volume controlled preamplifier unbalanced output to directly drive a power amplifier. Several inputs are furnished to interface many different audio systems and the digital chain is highly settable by the user. Because of its characteristics the VIVACE D/A Converter-Preamplifier is the perfect joining link between your digital audio sources and your analog world.

AUDIO ANALOGUE VIVACE

DAC / PREAMPLIFIER

powered by 

Main Features:

- Zero feedback output stage.
- Adaptive and Asynchronous USB interface working Up to 24bits/192KHz audio signal.
- Unbalanced analog Preamplified output.
- 3 Coaxial audio digital inputs working up to 24Bits/192KHz.
- 4 Optical audio digital inputs working up to 24Bits/192KHz.
- 1 AES/EBU input working up to 24Bits/192KHz.
- Balanced and Unbalanced line outputs.
- Phones output.
- Optical and Coaxial digital output.
- Completely settable DAC output sample frequency including the following selection criteria:
 - Auto Mode.
 - Custom Mode.
 - Direct Mode.
- Low noise custom quartz oscillators.
- Settable Brightness mode (High, Low, Dark mode).
- 12VDC Trigger Out.
- SPDIF Coaxial Digital output.
- ASC110 Multiproduct Remote.
